

School

We are an educational institution, which defines its place between the regular school and the parents.

We see us as a complementing element to the regular school and as a supporting institution helping to achieve educational goals.

The children and young adults pick up learning techniques:

- that give them joy and motivation,
- that enable them to independently cope with difficult learning material,
- that ensure the realization of educational goals, such as the "Realschulabschluss" and the higher education entrance qualification.

In our private lessons, we are geared to the content and methods of the respective regular schools. We offer parents and students, in close cooperation with the students and teachers, the possibility to work in a manner that is suitable for children, professional and output-oriented.

It gives us great satisfaction when the whole family can once again handle learning and school without any troubles.

We provide direct, individual aid, increase self-confidence, reduce fears and try to be there for our students and parents whenever we are needed.

Conception

Our idea of private lessons is comprised of several factors, which we search and find together, develop together and bring about mutual success:

- specific aid for the children, meaning that we try to individually respond to your child and adjust the teaching methods to the personal learning needs,
- the communication of learning techniques should facilitate a long-term learning progress, which enables your child to independently learn in the future,
- test our environment to ensure a pleasant atmosphere for successful learning and further educational aid for your child,
- To be a child isn't easy, but neither to be a parent. The association with each other can be improved through partial outsourcing of educational problems. We brace your child for regular school, so you can deal with daily associations with the regular school more easily. Use the limited, yet precious stress-free time with your children.
- We strive for an active communication with the parents and help them cooperate with the teachers at the regular school,
- We provide support for you and your child, assist your child with educational problems, stimulate motivation and joy at learning. You can count on us, regardless of when in your educational career. We are always there for you!
